

CONSCIOUS

FUTURE WORLD

A portal for inner and outer change

PRESS RELEASE

May 2026

[Norway] — *Conscious Future World* (CFW) is a new online portal.

CFW offers insightful articles, solutions, and deep reflections designed to catalyze a shift in worldview. Its content bridges spiritual, psychological, social, economic, and ecological themes, grounding them in ethics, human dignity, and long-term thinking.

Inner Change as the Foundation for Outer Change

CFW emphasizes that sustainable and ethical changes in politics, economics, technology, and society are inseparable from shifts in human consciousness.

The Portals

We have two portals which reflect a shift toward a conscious worldview where inner growth and external change evolve together.

Conscious world

An unconscious world creates division. A conscious world creates connection, compassion, and a future that works for all.

CFW is accessible to anyone seeking depth, clarity, and meaning in times of global transformation.

CFW is independently run and supported by voluntary donations.
